Subject: Net Savings

Deborah - SC needs to walk our talk. SC needs to do it's part to help conserve energy. SC needs to be as progressive as 40 others states. One important step along the energy conservation path is Net Savings. We need an effective way to actually impliment this action.

Let's stop being a slave to the energy company lobbists that fight progress AND conservation merely to increase their profits. We're in this battle together, please do what is best for both the State and the Country.
